I ABOUT US

Aqua Sure Trading & Services, a division of Seashore Group, specializes in innovative water and air solutions designed to improve quality of life. Through advanced technologies and a commitment to sustainability, we provide reliable solutions for water purification, air quality enhancement, and environmental well-being.

OUR MISSION

Our mission is to create healthier living environments by delivering clean water and fresh air through innovative, sustainable solutions. We are committed to improving everyday life while contributing to a cleaner and more sustainable future.

IMPACT: Through our advanced water and air solutions, Aqua Sure promotes healthier lifestyles by ensuring access to clean water, fresh air, and improved well-being for individuals, families, and communities.

PUMPS

Aqua-Sure offers a variety of pump solutions for water management applications, including submersible pumps, centrifugal pumps, and booster pumps, designed to meet the diverse needs of residential, commercial, and industrial clients.

EBARA

Aquasure is an authorized distributor of Ebara chilled water pumps, offering a comprehensive range of products designed to meet diverse market requirements

MODEL GS -Standardised end suction pumps

The GS series delivers world-class pump efficiency with an MEI rating of ≥ 0.7 or 0.6, ensuring lower energy consumption, reduced motor power, and a compact design. Its back pull-out structure allows easy maintenance and inspection without removing the suction and discharge piping, minimizing downtime.

CRI

Aquasure offers a comprehensive range of CRI pumps, renowned for their reliability, efficiency, and versatility. Designed to meet diverse water management requirements, CRI pumps cater to residential, commercial, agricultural, and industrial applications

HOW IT WORKS

1. UNFILTERED WATER

Contains sediment, chlorine, scale and other impurities.

2. ADVANCED FILTRATION

FLUUX filters reduce contaminants and scale using high-performance media.

3. PROTECTION

Protects equipment from scale buildup and extends equipment life.

4. BETTER WATER

Clean, great-tasting water for optimal performance.

KEY BENEFITS

BETTER TASTING

Enhances the taste of coffee, tea and beverages

LOWER COSTS

Reduces maintenance and service costs.

EQUIPMENT PROTECTION

Prevents scale buildup and equipment downtime.

EASY MAINTENANCE

Quick-change cartridges for simple replacement.

HIGH FILTRATION CAPACITY

0.5 micron filtration with high dirt-holding capacity.

RELIABLE QUALITY

Consistent performance you can depend on.

Better hair & skin begins with better water

Waterscience shower filters are engineered to reduce chlorine and impurities, delivering cleaner, softer water for healthier hair and refreshed skin—every day.

Wide range of Filters & Softeners

Cleaner Water

Effectively reduces chlorine and impurities for cleaner, better-smelling water.

Healthier Hair

Helps reduce dryness and frizz, leaving hair softer, shinier, and more manageable.

Gentler on Skin

Minimizes dryness and irritation for smoother, healthier skin..

Easy to Install

Fits most standard showers and can be installed in minutes.

KENT BATHROOM WATER SOFTENER

SOFT WATER FOR HEALTHIER LIFE

Converts hard water into soft water, a compact water softener designed to prevent hair loss and skin dryness.

Prevents Hair Loss & Itching

Reduces Soap Usage

Anti-Scaling Protection

Longer Appliance Life

Softer Skin & Hair

Saves Water & Detergent

EASY TO INSTALL AND USE

TWO-STEP REGENERATION PROCESS

EFFICIENT ION-EXCHANGE PROCESS

KEY BENEFITS

- Prevents hair loss and reduces itchiness & dryness on skin
- Reduces the consumption of soap and shampoo
- Reduces scaling & corrosion in appliances
- Consumes less detergent
- Consumes less water
- Prevents scaling in shower
- Increases life of internal part of geyser
- High quality resin for longer life and efficient ion-exchange process
- No pressure operation and stand by mode for longer life

CENTRAL WATER HEATER SYSTEM

A central water heater system provides an efficient and reliable hot water supply to multiple outlets simultaneously, ensuring convenience for homes and businesses. It reduces energy consumption by heating water only when needed, leading to lower utility costs. The space-saving design eliminates the need for multiple heaters, streamlining plumbing and maintenance. Additionally, it enhances property value by offering long-term cost savings and improved efficiency.

SERVICES

Professional services ensure the efficiency, reliability, and longevity of essential systems like pumps, HVAC units, and commercial refrigeration. Regular maintenance prevents costly breakdowns, reducing downtime and operational disruptions. Proper repairs enhance energy efficiency, leading to lower utility costs and improved performance. Expert troubleshooting and servicing extend equipment lifespan, maximizing return on investment. Well-maintained systems create a safer and more comfortable environment for businesses and customers. Investing in professional services boosts productivity, sustainability, and long-term cost savings.
